THE GLAD PATCH

Spring 1941

Price list

Normal, Illinois

We are thankful we have so many good glad friends and we appreciate the orders you have sent us. In return we assure you, we will exert every effort to send you the kind of bulbs you order, when you want them.

The reason behind this style of price list is to cut costs so we can supply you with the highest quality bulbs at the lowest cost to you. Our motto, quality and service.

The sudden cold weather last fall caught our newer varieties still in the field. Larger plantings of commercial glads were dug first. The glads we offer are good ones, and when well grown and exhibited in full bloom have won first prizes. Some have won champion and grand champion prizes. Our soil is fertile loam that puts vitality into the bulbs so they can produce prize winning spikes for you, if given proper treatment. Our stock was treated with Semesan before being planted in soil that had never produced glads. We have not been bothered with thrips.

Cultural hints, care of flowers and bulbs, insect control and kindred subjects will be included with your order.

AMADOR will open five or six, medium red florets at one time. The florets face one way. Spikes are tall, straight and not too heavy. Color a little darker than Dr. Bennett.

AVE MARIA is our only medium light blue. Florets are darker in the throat. Seven florets open. Good spike.

BETSY BOB UP has cream colored florets with pink markings. Since it is a color sport of Betty Nuthall it has all of the growing habits of that variety.

BETTY NUTHALL. Up to eight salmon pink florets on tall strong spikes. Some yellow and red markings must be the reason some folks call it orange. Late bloomer.

CHRISTABEL is a strong growing light pink that needs but a few spikes to make a bouquet. Seven or eight large florets cause the spikes to bend in the rain. Cut it early.

DEBONAIR. This one rivals Picardy in beauty. The spikes are tall, straight, strong and make even growth. Six or more, light pink florets will open at one time. Late mid-season blooming. Rapid increase.

DREAM O'BEAUTY is well named. Almost everyone likes this huge rose-red. Spikes are strong and always straight. The placement is not always good, but florists take all they can use and we usually run short. With this one in your garden, folks will not only look twice, but keep on looking.

DR. F. E. BENNETT. Tall, strong, straight spikes with six large scarlet florets makes this a showy glad. White median lines on most petals. A good show and commercial glad.

EARLY DAWN. Probably the largest of the early glads. Five or more large salmon pink florets on tall, strong spikes.

GOLDEN CUP. Florets medium deep yellow with faint red lines. Five or six medium size florets on tall spikes that sometimes crook a little. Blooms in mid-season.

LAVENDER DELIGHT. Straight, medium weight spikes that are not too tall. Medium sized florets of deep lavender with light throats. Early mid-season. Increases rapidly.

LIGHTS OF GOLD. Gold in throat and pink towards the outer portion of petals. A very pleasing combination. Six or more florets, well arranged on straight spikes.

MAID OF ORLEANS. Six or seven large florets that are milk white with cream throats. Spikes are tall and strong. A show glad as well as great commercial. Early mid-season.

MARY ELIZABETH. Another milk white, but this one has a yellow throat. Good length spikes and lots of bloom open. A good show glad if given extra care. Plant it early for best results as it blooms late.

MILDRED LOUISE. Large, wide open, salmon pink florets. Tall, straight, slender spikes. Six or more florets open. Given the same amount of care, this one will take its share of winnings from Picardy. Mid-season.

MINUET. Tall, strong, heavy spikes with six or more large lavender florets open. Blooms in mid-season. Rarely ever defeated on the show bench when well grown spikes are shown. The best lavender at low cost.

MRS. LULU HUNT. Our first offering of this early mid-season glad. Six or more salmon pink florets on straight slender spikes. Florets medium size, placement good.

PHYLLIS MC QUISTON. Six pure pink florets on a straight strong spike makes this one a striking beauty. It is fine.

PICARDY. The glad that florists and others rave about. It holds the enviable place of No. 1 glad. Seven or eight large salmon pink florets on tall, strong spikes if well grown. It requires plenty of moisture for best results. Mid-season.

PRAIRIE GOLD. Deepest yellow with carmine hair-lines on tips and reverse of all petals. Tall, strong, straight spikes.

RECOVERY. Grand Champion of Illinois in 1939. Tall, straight strong spikes with, up to eleven, five inch florets open. Color is light red, sometimes flecked deeper with hint of rose. Mid season. Spikes about same height all over the field.

PRICES. Any variety as follows. Prepaid to you providing your order amounts to \$2.00. Large bulbs are 1 1/4 inches and over. Medium bulbs are 3/4 to 1 1/4 inches. CASH with your order please. Not safe to mail coins or stamps.

Large bulbs, one variety, 10 for 35¢, 25 for 70¢, 100 for \$2.50
Medium bulbs, one variety, 10 for 25¢, 25 for 50¢, 100 for 1.75
